

VeyFo®CalciMin 380 + Mg

Mineralni pripravak

Sastav i djelatna tvar:

Kalcij glukonat (38%), magnezij klorid heksahidrat (6%)

VeyFo® CalciMin 380 + Mg je dodatak prehrani u obliku sterilne vodene otopine koja se odlikuje odličnom biodostupnošću visoko kvalitetnih komponenti čija je primarna svrha smanjiti rizik od pojave mliječne groznice u krava (peurperalna pareza).

Kod ovaca, koza, svinja i konja proizvod se koristi kao dodatak kojim će se zadovoljiti dnevne nutritivne potrebe. Sadrži kalcij glukonat i magnezij klorid heksahidrat, a životinjama se daje putem hrane i vode za piće.

Doziranje i način primjene:

As Supplementary Dietetic Feed Dietetic purpose: to reduce the risk of milk fever			
Species	Special demanding period	Qty./day	Duration
Dairy cows, First calving heifers	Starting at the onset of calving until 2 days after calving	up to 500 ml	Repeat feeding possibly after 24 hours
